Beware of Stimulus Check Scams

Grocery Store Special Hours

Many grocery stores have special hours either for re-stocking or for seniors and others to have a quieter shopping experience. Please visit our community resource list to [view hours at different stores](#).

Staying Safe While Grocery Shopping

Whether you are grocery shopping for your family in person or utilizing curbside pick-up/delivery options, there are still important safety practices that can help to limit your risk of exposure to COVID-19.

- Follow [federal guidelines](#) regarding social distancing and prevention. Maintain 6 feet of distance between yourself and other shoppers/grocery store employees. Pay particular attention when standing in line and continue to observe the 6-foot rule at all times.
- Disinfect high-touch surfaces such as grocery carts handles with a disinfectant wipe, if possible.
- If you use a debit or credit card, keep in mind that those machines are high-touch surfaces. Wash your hands after touching those surfaces and wipe down your cards with disinfectant wipes or an alcohol-based sanitizer. The [EPA has created a list of known disinfectants](#) that are effective against COVID-19 on surfaces.
- If possible, go to the store during off-peak hours when the store is less crowded. If you are a senior, try to shop during the Senior Hours that are offered at grocery stores in the community.
- Discard any disposable grocery bags upon unpacking your groceries and disinfect counters and surfaces where bags may have been placed for unpacking.
- Always wash your hands after handling food packaging and before eating.

Please keep in mind, [the FDA has stated that there is no evidence that COVID-19 is transmitted via food](#). It is a respiratory-borne virus and therefore the risk of contracting it through food or food packaging is extremely low. The main risk to an individual is thought to be from exposure to another person with COVID-19, who is symptomatic or asymptomatic, and touching one's face or mouth after coming into contact with an infected surface. [Social distancing and washing your hands frequently remains the most effective way to prevent the spread of COVID-19](#).
